DETAILED ACTION

Response to Amendment

1. The reply filed on November 21, 2007 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): Claims 21-31, 41, 43-51, 53, 55, 56 and 58-66 that were examined in the last office action recite a computerized method of modifying data associated with a payor account from a financial transaction between a payor and a payee, comprising: entering data that identifies a credit or debit amount into a point of sale terminal controlled by the payee; transmitting the data that identifies the credit or debit amount from the point of sale terminal to a separate network controlled by other than the payee, wherein the point of sale terminal accepts both credit and debit amounts; within the separate network, modifying data associated with the payor account as a credit or debit based on the credit or debit amount of the data, wherein the payor account is a voucher account; receiving by the payee an amount of money based on the credit amount of the data during the financial transaction; and transmitting the modified data representing a debit or credit back to the payee; whereas the newly presented claims 67-79, recite a point of sale operating method, comprising: entering an amount corresponding to cash being offered into a point of sale terminal controlled by a merchant; calculating an excess cash payment; entering a card identifier; apportioning at least a part of the excess cash payment as a cash deposit to one or more voucher accounts identified by the card identifier; and entering a merchant sale amount into the point of sale terminal; and debiting the sale amount against the one or more voucher accounts, the one or more voucher accounts being identified with the card identifier independent of the point of sale terminal. A utility of the examined invention is transmitting the modified data representing a debit or credit back to the

payee and a utility of the newly presented claims is entering a card identifier. Clearly the methods of the examined claims and the newly presented claims are different, as evidenced by their preamble and their respective steps making them different in their scope and utility. Hence the two methods are distinct and different inventions. See 37 CFR 1.11 1. The two inventions also require substantially different searches.

The applicant elected the former invention by original presentation. The rejection of the examined claims as discussed in the office action stands. (See MPEP 8.21.03) Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).
